? How is the CTi Hallmark System Installed

The original concrete is repaired and .1
. cleaned to accept the Hallmark System

A base coating of acrylic cement is then .2
. placed over the entire surface covering
. any imperfections and creating the color
. for the grout lines

The pattern is placed over the base coat .3

The main texture coat is applied giving .4
. the Hallmark System a relief of tile, brick,
. etc

Highlight colors are added to provide a .5
. realistic look and depth to the system

The pattern is revealed in the "unveiling" .6

A final acrylic enamel sealer is applied .7
. that makes the system impervious to salt,
. mold, mildew and other elements that
. deteriorate concrete. The CTi Hallmark
. System also achieves a chemical bond
. with the original surface to provide a
. strong, long lasting finish
